

# Moxie & Turbo's Icy Adventure

**Moxie and Turbo are in a hurry to cross the street – but it's frozen solid.**

All they have for melting the ice is sugar and salt. There's not enough time to try both! You can help the duo pick the fastest one by doing this quick experiment with a parent.

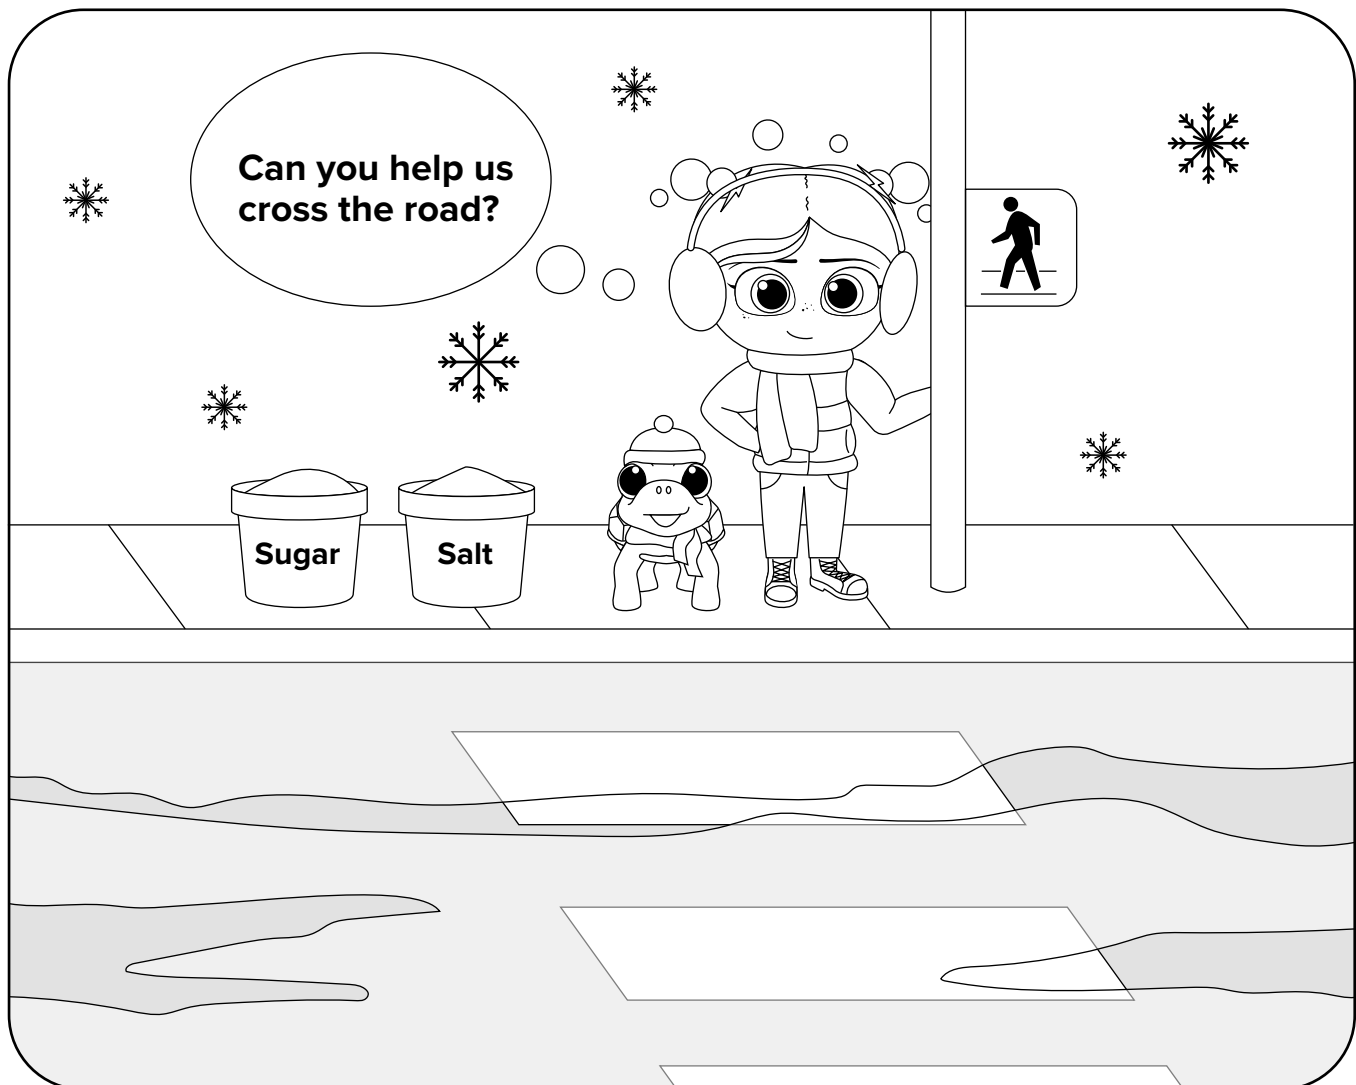

1. Grab two bowls and two ice cubes
2. Put one ice cube in each bowl.
3. Put a pinch of sugar on one ice cube.
4. Put a pinch of salt on the other ice cube.

**Which ice cube do you think will melt first?**

Make your guess, then check back every few minutes to find out.
